

Bericht von unserem lokalen Projektleiter Shalem Raju – Juli 2021

Greetings in the Name of Jesus Christ to all of you

In the year 2020, people never, ever heard about the pandemic disease Corona. Firstly, people didn't have awareness or fear about diseases for few months. Then people feared about the disease that will affect the families within a few days and also it leads to death. In that year people suffered a lot for food because it leads to sudden full lockdown. No vegetables, no provisions, no job, and most of the people also didn't have money, some of the people are daily wages people, middle class and poor suffered a lot for food. Even government also trembled a lot how to help the people in this crisis period.

In that time, we helped 107 families in our village, our student families 20 in Prakasam & 10 families in West Godavari. I hope everyone felt very happy and thanked God for our timely help. We also provide some Mask and Sanitizers to nearly 300 people.

In 2021 even though Corona effect is more than 2020, people have taken more care precaution to protect themselves from Corona. Government also didn't put full Lockdown as in the year 2020. In 2021 we have some relax in Lockdown. People also went to their respective work wearing mask.

Our student families are Orphans, they are very poor, most of them are daily wages people, some are grand-old parents. These grand parents depend on their old age pension. Most of the people suffered a lot for food for them and their children. In this critical situation our help for our students is so useful in education and to provide for their needs.

By our God's grace our students have support from the organization. If they didn't have the support from you most of the students would have to drop their education because of being unable to pay the fees. Your help is so helpful for our students also in the academic years 2019-20 & 2020-21.
